

Prevention of floods having come into operation on the day of assembly, all persons attending against it are liable to a penalty of \$4 per day. Mr. SOUTH, of No. 8 and 10, Portland place, Waterbury road, London, respectfully informs the public that he has a PATENT PLAN for the ANNIHILATION of BRICK which saves fuel, is cheap, perfect and complete. It does not require brick chimneys, but only wicker or iron pipes in them, may be used at work daily in the above-named works. It is connected with any machinery, the whole being the arrangement of a few lights made on purpose for the construction, and may
